

January 2019 Update

WI Invasive Species List - Recommendations Needed

The WI Invasive Species Council is in the process of considering species listed under NR 40, the administrative code which determines the list of Restricted and Prohibited Invasive Species in WI - aquatic, terrestrial, and otherwise. If you have comments on species to consider for listing or delisting make sure to check out the announcement. The deadline is fast approaching - midnight Fri Jan 4, 2019.

Public Comment Period - DNR Aquatic Plant Management Strategic Analysis

This strategic analysis is the first step in reviewing NR 107 and NR 109, the code regulating control of native and invasive aquatic plants in WI. It's a long read, but if you have concerns regarding what can and/or should be done to control aquatic plants, consider giving it a once over. Public comment period ends Jan 25.

Want to Know When Your Neighbors Are Applying Pesticides?

The State Dept. of Agriculture, Trade, and Consumer Protection maintains a listing of people who get contacted when a licensed pesticide applicator will be applying pesticide to your area, including mosquito control. The deadline to register to be notified for summer 2019 applications is Feb 1, 2019.

Need Native Plants?

Iron County is extending their native plant seedling offerings to Vilas County residents. These are species often recommended for shoreline restorations and are at fantastically affordable prices. If you're interested but not sure what to plant where, contact [Quita Sheehan](#) for advice. Order deadline is Feb 22, 2019.
