**5. Discussion and possible action on lake management activity completed in 2019 and 2020, recent lake surveys and conversations with the WDNR and Onterra.**

North Twin – We have achieved very good results from our ProcellaCOR treatments of the milfoil as well as the DASH activities from both 2019 and 2020.

South Twin – While the treatment of the EWM has been somewhat successful, there are still approximately 40-60 acres that are troublesome. SePro, the chemical company who guaranteed a successful outcome, has completed a site visit and they have agreed to provide ProcellaCOR product based on their warranty. The amount will be determined based on a PI of the EWM to be performed in early August by Onterra.

Commissioner Fritzsche made a motion to spot treat 28 acres of South Twin (areas designated on the treatment map as X-20 and Y-20) with ProcellaCOR in August 2020 as a follow-up to the 2019 EWM treatment, authorizing the Lake District Treasurer to submit a permit application to the WDNR, negotiate with SePro regarding the Fluridone performance warranty, engage Onterra, LLC to complete additional sub-PI work as may be required by the WDNR, and engage Amy Kay of Clean Lakes Midwest/Clarke Aquatics as the spot treatment applicator.
